

FIRE EXTINGUISHER TRAINING

Course Format

This course has been designed to educate and build the confidence of those who may be required to use a fire extinguisher. Participants will learn, the classification, growth and extinguishment of fires. I use power point presentations, class discussion and audio and visual tools to drive the point home on how fire can affect you. When this is done you will be given the chance to extinguish a fire.

Course Objective

The participant will learn when and how to use a fire extinguisher to successfully extinguish fires using proper techniques. Each participant will develop greater confidence in their capabilities to cope with an emergency.

Who Should Attend

This course is designed for persons who may need to use a fire extinguisher, including most workers and the general public. This course is highly recommended for those providing care for others, including daycare, health-care, and corrections workers.

Benefits of the Course

- Trained employees use portable fire extinguishers with 2 1/2 times greater effectiveness than untrained employees.
- Property losses through fire can be reduced or eliminated.
- Production downtime or loss of valuable materials could be reduced or eliminated.

Course Outline

- Introduction
